

<b>Process Name:</b> Applicant Services		<b>Process Identifier:</b> AS	
<b>Sub-Process Name:</b> Application Processing		<b>Sub-Process Identifier:</b> AS-01	
<b>Sub-Process Purpose and Objectives:</b> Control the processing of applications (online or paper) through the testing process and placement on registers.			
<b>Sub-Process Description:</b> Enable applicants to submit their employment application online or make changes to their existing application, and test for job openings based upon their meeting the minimum qualifications for open position.			
Applicants will apply one of three ways for open positions: 1) on-line, 2) by mail, or 3) hand deliver their application. Edison will effectively screen, filter, sort and rank applicants based upon their education and experience. The recruiting portion of Edison will edit incoming applications, both postal and online, using workflow-supported processes. It will reject applications that fail to meet the minimum qualifications for the position applied, and send email or postal notification regarding why the application was rejected. If an applicant meets the minimum qualifications, then an electronic or postal invitation will be sent to the applicant to set up an interview for the position, and automatically set up appointments. Edison will maintain all applications that were entered online and the system will have the capability to store supporting scanned documentation. Any paper applications will have the minimum entered into Edison by DOP. Edison will then send a notification asking the applicant to visit a kiosk or any location that has web access to enable them to complete the remainder of the application process. In the future, scanned documents should be loaded into an online application within Edison.			
Applicants will be placed on register reports once the application and potential corresponding position questionnaires have been completed, and the score has been automatically generated. These register reports can range from a standard report showing highest to lowest scored applicants to special customized reports that are broken down by specific areas, county codes, districts, etc.			
<b>Sub-Process Trigger(s):</b> <ul style="list-style-type: none"><li>Electronic application submitted</li><li>Paper application submitted</li></ul>		<b>Key Sub-Process Participants:</b> <ul style="list-style-type: none"><li>Applicant</li><li>DOP</li></ul>

<b>Process Name:</b> Applicant Services		<b>Process Identifier:</b> AS	
<b>Sub-Process Name:</b> Applicant Selection		<b>Sub-Process Identifier:</b> AS-02	
<b>Sub-Process Purpose and Objectives:</b> Manages the selection of applicants to fill career service vacancies in accordance with Civil Service laws, rules and policies.			
<p><b>Sub-Process Description:</b> The applicant selection process begins with the identification of a career service position that needs to be filled. If there is a freeze in filling positions in effect, the agency must request freeze exemption before beginning this process. If there is not a freeze in effect or the agency gains approval to fill the position through the freeze process, the agency may go ahead and request a register. The agency reviews the register options, including appointment and promotional registers to determine the optimal candidate list to fill the position. Employees on the Reduction in Force (RIF) list will appear as appropriate on the particular register requested. The agency determines how many applicants will be contacted to fill the position and “saves” the list as the official register that will be used to fill the position. The agency will enter the body of the interview letter in Edison, and based on the applicant’s selected notification method (e-mail or letter) Edison will send either an e-mail message or generate a letter with appropriate mailing addresses to be mailed to the applicant. The applicant will respond to set up an interview, give a reason for not interviewing or not respond to the interview letter at all. Once all interviews are conducted, the responses will be documented in Edison. Based on the responses, Edison will perform edits to determine whether the applicant(s) selected was reachable (within the top 5 on an appointment register or within the top 3 on a promotional register). Edison will generate response letters (including letters to applicants not selected) to the applicants as e-mail or letter notification and update the applicant’s record appropriately. The register used to fill the position(s) along with all relevant data will become an official record in Edison. At any point in the process the agency may elect to cancel the register or let it expire after the 28 day period. These registers may also be updated with responses from applicants and they will also become an official record in Edison.</p> <p>Edison will save the applicant record to a pending file, and this process will transfer to Personnel Actions (PA-01) for the candidate to be hired.</p>

**Process:** Applicant Services  
**Sub-Process:** AS-03 Application Register Processing  
**Prepared By:** Project Edison – State of Tennessee

**File:** To Be AS-03 Application Register Processing  
**Date:** 10/21/05  
**Page:** 1/1

<b>Process Name:</b> Applicant Services		<b>Process Identifier:</b> AS	
<b>Sub-Process Name:</b> Application Register Processing		<b>Sub-Process Identifier:</b> AS-03	
<b>Sub-Process Purpose and Objectives:</b> Update job descriptions and establish job classes as needed, based on changes made by Class/Comp and/or Examinations Divisions to competitive Career Service classifications and/or examinations associated with a classification.			
<b>Sub-Process Description:</b> Class establishments and updates to job descriptions are initiated when the Class/Comp Division abolishes a classification that is Career Service (Civil Services) and requires a competitive examination. Register establishments are initiated after the Class/Comp establishes a new classification and the Examinations Division has developed the appropriate examination materials (e.g., written test, training and experience rating guideline) for that classification. Registers are abolished and then re-established when the minimum qualifications for an existing job classification are changed and are now more restrictive and/or when the examination method or content for that job classification are changed (e.g., revised written test or revised rating guideline). Class/Comp, Examinations and Applicant Services receive notification of the final announcement.
